

NICHOLE VAN'S ESSENTIAL BW ACTION SET PSE

This document provides an overview of the actions included within the Essential Black & White set for Photoshop Elements 6 and higher.

THE ESSENTIAL BLACK & WHITE ACTION SET FOR PSE 6 AND HIGHER

This set contains the following actions:

ACTION	PURPOSE
Essential BW	This action creates a truly traditional film BW look to a photo. It also loads layers that allow you to add a sepia, blue or chocolate tone to the photo by toggling the layers on and off.
Light BW	This action provides a gentle touch BW that is lighter than the Essential BW. It also loads layers that allow you to add a sepia, blue or chocolate tone to the photo by toggling the layers on and off.
Dark Moody BW	This action creates a dark, deep BW image, darker than the Essential BW. But the action allows you to recover details that might become too dark after the action has run. It also loads layers that allow you to add a sepia, blue or chocolate tone to the photo by toggling the layers on and off.
Edge Vignette	This action adds an adjustable vignette to the edge of a photo. It works best on photos that are at least 1000 pixels on each side.
Sharpening	This action allows you to selectively sharpen your image.
